DETAILED ACTION

1. This office action is in response to applicant's arguments filed February 06, 2007 in application 10/803,848. Claims 2-21 are presented for examination.

Response to Arguments

2. Applicant's arguments filed February 06, 2007, have been fully considered but they are not persuasive. In regard to claim 21, applicant amended to add the limitation of tangible to a computer-readable medium without any support for this limitation in the specification. Furthermore, applicant's specification (*page 23 lines 15-21*) disclosed a computer program products comprising of signals transmitted over a network representing computer readable code is non-statutory and is still subjected to U.S.C. 101 rejection.

Allowable Subject Matter

3. Claims 2-20 are allowed.

The following is an examiner's statement of reasons for allowance: The examiner deem claims 2-20 as novel when reads as a whole for the limitations of upon determination that said stack frame is corrupted, replacing said second state of said stack frame with said copy of said first state of said stack frame.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claim 21 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

In regards to claim 21, computer-program product claimed as computer listings per se, i.e., the descriptions or expressions of the programs are not physical “things.” They are neither computer components nor statutory processes, as they are not “acts” being performed. Such claimed computer programs do not define any structural and functional interrelationships between the computer program and other claimed elements of a computer, which permit the computer program’s functionality to be realized. Therefore, the specified claims do not fall within the technological arts and therefore, is non-statutory. See MPEP § 2106. Refer to applicant’s specification (*page 23 lines 15-21*) and examiner’s response to arguments for further details.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO 892.
